Work Experience

Technative Consultancy Pvt.Ltd, Pune

Associate   06/2019-Present

Worked as a full stack developer, to build web applications for 3 projects, each involving a client
From different domains, thus getting varied experience. All these applications had hapi JS for backend, mongo db as the database, while 2 used Preact as the frontend technology, and one used React.

- ➢ Created a chatting application using websockets.
- ➢ Parser to parse a csv file into json, which enabled moving data from excel to Json format.
- ➢ Worked on the PDF Make module and added the functionality into the application.
- ➢ Integrated AWS SES service, and Twilio messaging service for communication.
- ➢ Added Multi Factor Authentication and enhanced security of the application.
- ➢ Developed Multimedia section of the application handling audio and video players.

Software - Intern   02/2019-06/2019

Learned technologies of web development, and implemented them on ongoing projects
- ➢ Resolved issues in applications.
- ➢ Worked in software training events, by demonstrating the software, and clearing doubts.
